

Publish your live Virtual Universe Pro projects on the Web

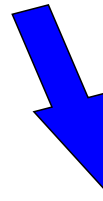

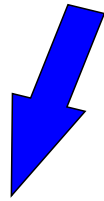

DS Solidworks

Autodesk Inventor

Solid Edge

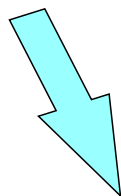

Virtual Universe Pro

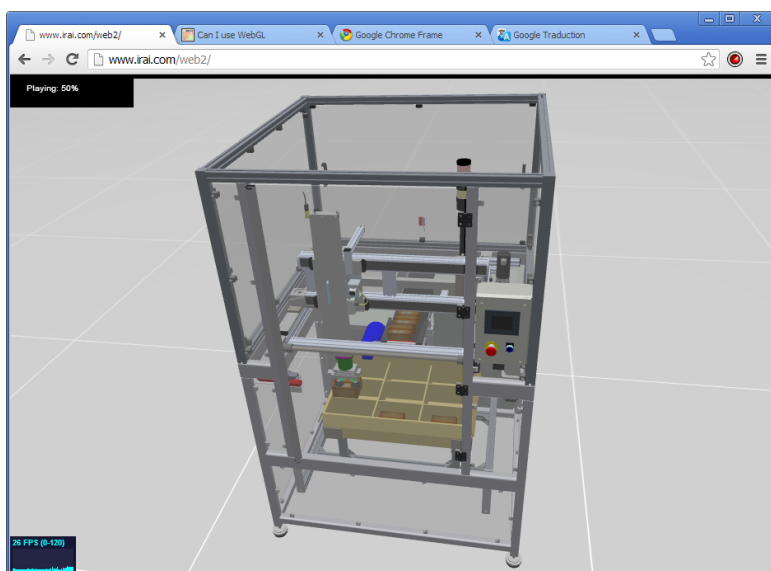

Web server

Virtual Universe Pro Web server

WebGI compatible browser*

From the Web Browser, the user can navigate into the 3D model (zoom, translate, rotate).

If connected to the Virtual Universe Pro Web Server, the navigation is « live », it means that the project displayed in the browser is the live project simulated in Virtual Universe Pro.

If connected to a « classic » Web server, a recorded simulation of the project is played but the user can also navigate into the 3D model.

* for more informations on compatible web browsers, please check <http://caniuse.com/webgl>
